- Paper
- Film

GHS Intl. Drum Labels

- Meets BS5609 Standards

Distribution

- Kitting
- Co-Packing (Ribbons & Labels)
- Warehousing

Warehouse

- Rack Label Production
- Installation
- CleanBeam/CleanBin
- Warehouse Signs

Specialty Film

- BOPP
- Mylar
- Kapton
- Many More

Thermal Ribbons

- Platinum Wax
- Platinum Wax/Resin
- Platinum Resin

Digital Labels

Eliminate plate and die charges with our digital division.

Digital printing is a cost-effective method for producing custom labels with photographic quality graphics, crisp text and vibrant colors. Typically suited for smaller orders of 50,000 custom labels or less, digital printing is less labor intensive and produces limited set up waste.

Now you can get high quality labels with impressively quick turnarounds and affordable prices for quantities as low as 100 labels. With our latest state-of-the-art inline precision laser die cutters, there are no more costly die charges. We maintain the fastest and most powerful lasers available to decrease production times.

We can run rich 4 color process printing of any shape label up to 8.7" wide (with up to 10" wide web) at virtually any length with high quality inkjet printing and laser die cutting.

Also, our digital presses are now officially certified to run UL and cUL labels.

Digital is Great For:

- Promotions & Marketing
- Decorative Product Labels
- Barcoding and Variable Data
- Durable & Industrial Labels
- Unique Shapes and Sizes

Aqueous VS. UV Ink

Aqueous Ink Jet Printing

- Smaller dot pattern yields higher resolution
- Has the look and feel of flexo
- Currently has faster print engines
- Can be variable imaged by end user
- Materials must be primed for proper ink adhesion

UV Ink Jet Printing

- Very durable ink cured to face stock with UV light
- Has the look and feel of screen printing
- Resistant to water and fading
- Limited need for lamination or varnish
- Prints on most materials

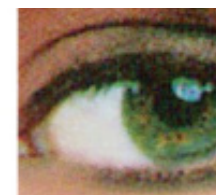

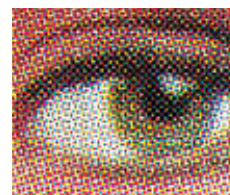

Flexo Labels

Tri Pro has a large fleet of flexographic label presses and thousands of dies to choose from at each of our production locations. We finish very large label runs quickly and economically.

With our vast selection of dies we pass on the savings.

Our flexo presses utilize the latest HD plate making technology, permitting higher screen resolution & better print quality. Tri Pro is the ideal partner for your custom label needs. We prepare all artwork and plates in-house, allowing us to maintain tight control over cost, quality and speed.

Standard VS. HD Plates

See the *difference*.

Warehouse Labels & Services

Service Overview

With all the diverse challenges you face managing your WMS system, why should you go at it alone when you could have the backing of one of the top experts in the industry?

We combine a thorough understanding of warehouse operations, barcode scanning and label production to help you install a customized barcode warehouse label solution. We work through the details of

your warehouse labeling needs, so you have more time to focus on what you do best — run your business.

At Tri Pro, we realize that every installation is a custom project. Variables include the facility, available staff, "go live" date, budget and more.

Consultation

No two warehouses are ever exactly the same. Tri Pro will begin with an analysis of your facility's needs and requirements so that labels can be manufactured in such a way to make the install process most efficient. All our signs and labels are custom designed for each specific application. Because you can't fit all warehouses to a predetermined signage solution, we design customized warehouse signs for your unique needs.

Complete Install

When you utilize the expertise of Tri Pro

to complete a sign or label installation, our experienced site management services will perform an analysis and present you with the best option. Our warehouse program provides a vetted on-site manager for the label installation to be your point person, managing the process from beginning to end.

Also, you will receive a complete array of products and services from our experienced team of professional installers, including all materials, labor and equipment necessary for your project.

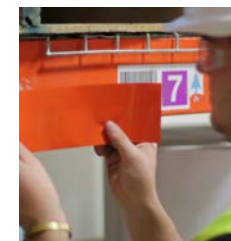

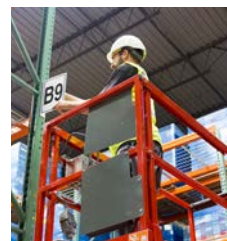

Labeling & Signage

Warehouse Labeling

- Rack Labels
- Shelf Labels
- Floor Labels
- Metal Labels
- Pallet Labels
- Freezer Labels
- Tote/Container Labels
- Cover Up Labels

Warehouse Signage

- Aisle Signs
- Hanging Signs
- Barcode Signs
- Dock Door Signs
- Rack Load Signs
- Facility & Safety Signs

Flexible Packaging

Lightweight & Durable

As one of the fastest growing segments of the packaging industry, flexible packaging combines the best qualities of plastic, film, paper and aluminum foil to deliver a broad range of protective properties while employing a minimum amount of material.

Typically taking the shape of a bag, pouch, liner or overwrap, flexible packaging is any package, or any part of a package, whose shape can be readily changed.

Working with a flexible packaging supplier should be just as flexible as the packaging itself. That's why you need a consistently dependable partner. At Tri Pro, we value your success as much as you do. We are the flexible packaging printer of choice when dependability, quality and service matter. You'll get what you need, when you need it.

Durable Labels

UL/cUL

Only UL-certified manufacturers like Tri Pro are authorized to produce labels with the UL or cUL symbols. That means our labels meet all UL standards and can be backed up with official UL certification paperwork in the event of an audit. Don't put your business at risk of being caught with unauthorized UL labels. Stick with Tri Pro and rest assured of being in complete compliance.

Our digital printers are now officially certified to run UL and cUL labels so you can provide UV digital test runs as a low-cost solution.

GHS

GHS – Globally Harmonized System – is used to standardize the way hazardous materials are classified. BS5609 is the British Standard certification used to determine the label's overall durability such as weathering, abrasion, colorfastness and adhesion in marine conditions.

What we need to know:

- How long is the label required to last?
- Does your label need BS5609 Section 2 & 3 approval?
- What type of print technology & printer will be used to create these labels?
- To what surface will the label be applied?
- Will the labels be exposed to extreme temperature & environmental conditions?
- Will the label ever need to be removed?

Prime labels with *secure* print features.

Augmented Labels

Security Solutions

Are you looking for a new marketing angle or to implement a simple print security feature? Tri Pro now offers Augmented Labels. These labels are custom designed with both brand security and aesthetics in mind. Our labels provide unique brand-identifying labels that protect your IP.

In Demand Labels

Counterfeit and stolen products, from medication to electronics, account for a staggering market share. Imports of counterfeit and pirated goods are worth nearly half a trillion dollars a year, or around 2.5% of global imports.

Augmented Labels are promotional labels created to help you build and protect your brand at the same time. They offer features that go beyond custom or even high-quality prime labels.

The Features

3D Feel Print: Raised ink offers texturized text and images for a 3D feel. The added detail takes label quality to the next level.

UV Light Reactive Inks: Not visible to the naked eye without special light sources, UV or black light inks are commonly used with this feature.

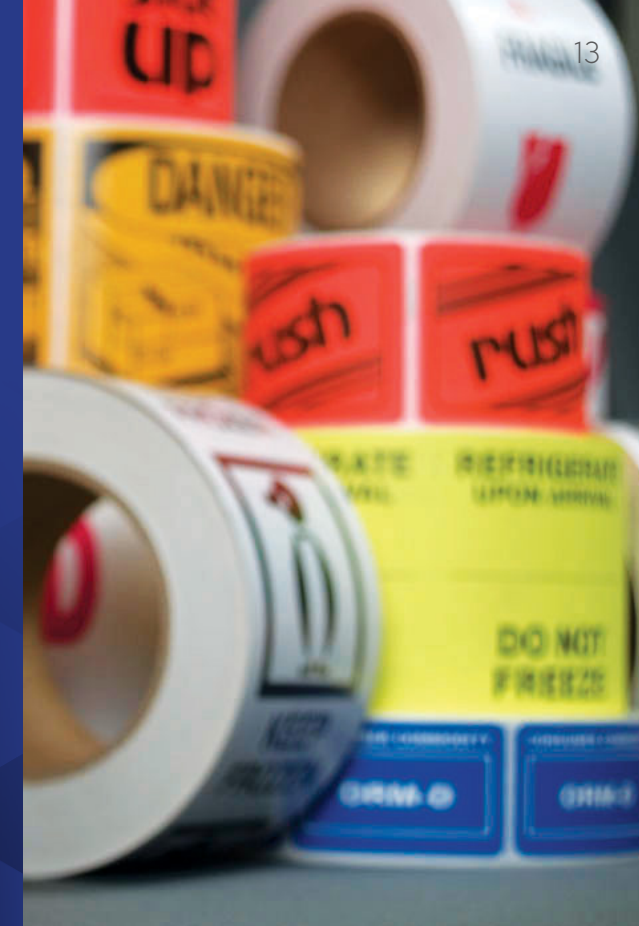

Microtext: The smallest printed microtext is normally 0.5pt. Placing an intentional error adds a second layer of security.

The Benefits

- Influence customer behavior by conveying key brand attributes.
- Stand out from competitive products by the addition of unique print effects.
- Easy-to-recognize (but hard-to-replicate) brand security features.

Stock Labels

At Tri Pro, we carry a full line of stock labels. These cost-effective, ready-to-ship products are available to be sent to you from one of our five regional locations. If you sell labels, count on us to be your high quality, great service stock label supplier.

Our experienced staff is ready to have your stock orders shipped accurately right to your door the same day you place your order. All stock labels ship the same day if ordered by 2 pm. local time.

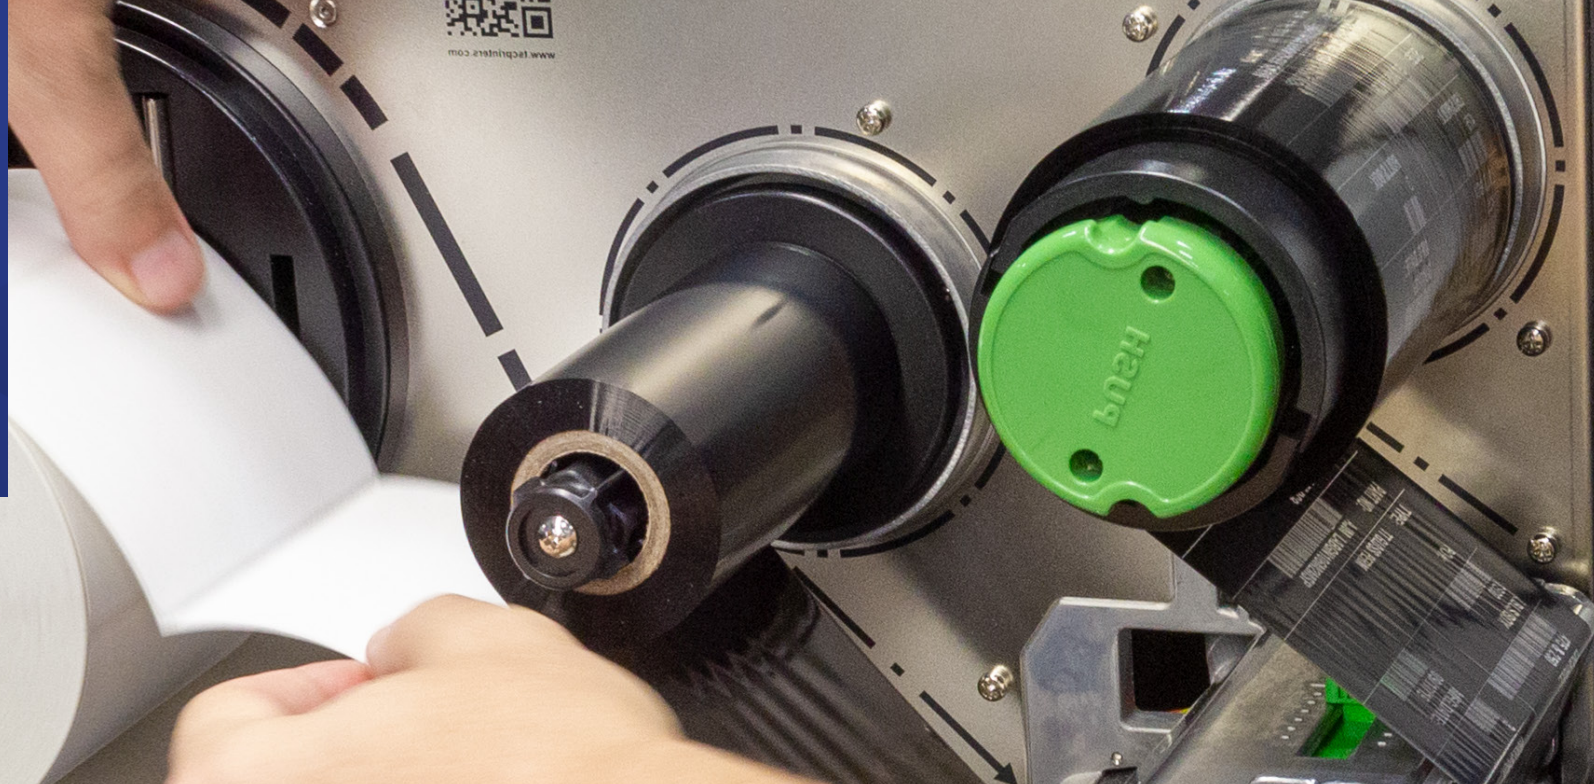

Offer your customers *thousands* of competitively priced stock labels.

Stock Offerings

- Thermal Labels
- Shipping Labels
- Laser Labels
- Colored Dot Labels
- Integrated Labels
- Specialty Labels

Thermal Solutions

Ribbons

Get the highest quality ribbons for less. Our platinum wax, wax-resin and full resin ribbons allow you to not only print a rich, dark black color, but also run at exceptional speeds (up to 16 ips), all at incredible savings.

Our platinum thermal transfer ribbons deliver superior barcode label printing for a wide range of applications, including floodcoated labels, shipping labels, harsh environment film labels and GHS labels. They are compatible with all the top brands of barcode label printers and work great with every thermal transfer label facestock.

Tri Pro has the *perfect* solution for all your thermal needs.

Thermal Labels

Tri Pro is a leader in the production of thermal labels and carry an extensive selection of stock thermal labels in both roll and fanfold formats. Select from a full range of blank labels in a variety of shapes in over 12 different colors & sizes, all ready for fast same day shipping.

Co-Packing

Our Co-Packs are a great way to order your thermal transfer labels & ribbons. Let us package your matching length labels and ribbons in one carton, improving your efficiency and eliminating waste.

Genuine Supplies

Do you use TSC or Printronix Auto ID thermal printers? If so, make Tri Pro your supplier of Genuine TSC and Printronix Auto ID Supplies.

We understand your sales success is based on efficiency, quality and total solution support. Therefore, we offer a comprehensive selection of Genuine TSC and Printronix Auto ID Supplies that provide guaranteed performance through your customers' TSC & Printronix Auto ID brand Industrial, Desktop and Mobile printers.

We offer a perfect genuine OEM match solution with:

- Labels for Industrial, Desktop and Mobile printers
- Tags and tickets
- Receipt rolls for Mobile printer applications
- Specialty and custom labels
- Thermal transfer ribbons

Label Markets

Auto ID Labels

For thermal label printers, Tri Pro carries a wide selection of labels in both roll and fanfold formats. We create Auto ID labels for a variety of applications including:

- TT & DT Labels
- Inkjet Labels
- Wristbands
- Mobile Printing Labels
- Thermal Transfer Ribbons

Durable Goods

Some labels need to withstand harsh environments: from abrasion to extreme temperatures. Identify your goods with durable labels.

- Equipment Brand Labels
- Warning Labels
- Utility Labels
- UL Labels
- Industrial Labels

Industrial

Tri Pro offers a wide range of labeling solutions for industrial applications. From hazardous materials transport to weather-resistant labels, we've got you covered.

- Supply Labels
